Drill holes for all
screws 1 3/8" apart

2 1/4"

2 1/2"

9"

5"

Try to use #12 wire
for phase lines but anything
close will be fine.
Copper,aluminum,steel
most any metal as long as
it makes a good clean connection
be sure to clean of all coatings,
rust, and oxidation.

4 BAY FEED

4 1/2"

The small black dots are where
the elements attach and the large black
dots are where the balun or feed wire
attaches.
Be sure that where the wires in the phase line
cross that they DO NOT touch each other.
Try to get between 1 inch of seperation
at the crossover.

4 1/2"

1 1/4"

5"

9"

9" element bay spacing
1 1/4" phase wire spacing

Use with 9 1/2" wisker elements

2 1/4"
