# Cut Sheet

All pieces are cut from 2" X 4" lumber ripped 1 5/8" wide with the 1 5/8" side toward the front except where noted. This gives you the 1 1/2" thickness needed for the rifle range target holders.

- A** (2) pieces 33 1/2" L
- B** (2) pieces 26 1/2" L
- C** (2) pieces 20 3/4" L
- D** (2) pieces cut with 45 degree angles as braces for lower part "**C**"
- E** (1) piece 24" L 1 1/2" square and notched to leave a 1/2" groove to hold the homosote
- F** (2) pieces 6" to 8" L 1 1/2" square notched as above
- G** (2) pieces 24" L from 1" X 2" as braces on the lower half with the bottom one 6" up.
- H** (1) Homosote 21" W X 24" T

If you don't want to make it so it folds, you can cut the two **A** pieces 60" long and not have to worry about the hinges and toggle clamps. Mine fits much better in the car with the hinges.

If you want it to fold these are the parts I ordered from Amazon:
